How to draw a RDF design diagram

Asked 5 years, 10 months ago Modified 1 year, 2 months ago Viewed 1k times

I'm learning about the Jena RDF API ,and I have seen some RDF that was showing in a diagram like this [diagram](#).

2 I want to know how to draw the picture like that.Are there any W3C standards or tools about drawing the diagram? For example,what do the ellipse and the rectangle represent? Thank you

From your question, I understand you don't want to find an RDF visualizer, but instead you are interested in a tool that can easily draw RDF graphs.

1

Unfortunately, I haven't been able to find a good tool either. For drawing simple diagrams I typically use draw.io, while for creating ontology diagrams I use [Graffoo](#).

Hope this helps.
